**FOR IMMEDIATE RELEASE**

**NOVX SYSTEMS INC. RECEIVES FDA 510(k) CLEARANCE FOR iMDx ON-SITE DRUG SCREENING PLATFORM**

Toronto, Canada, June 5, 2007 – NOVX Systems Inc. has received clearance from the U.S. Food and Drug Administration to market iMDx™ System (iMDx) for point-of-care screening for drugs of abuse. “This marks a major milestone for NOVX as it paves the way for product rollout to many thousands of addiction and pain treatment providers as well as employers requiring on-site screening for substance abuse. The iMDx System is unique in its level of automation and ease of use. It enables care providers and testing centers to obtain accurate and timely results at the point-of-care.” said Dr. Tino Alavie, President and CEO of NOVX Systems. “With this approval, NOVX can now provide a comprehensive solution previously unavailable from a single source.”

**On-Site Screening Redefined**

NOVX provides a simple yet powerful drug screening solution that allows on-site screening and real-time access to results. When paired with PatientVu™, the drug screening results and complete patient records are securely accessible from anywhere via the internet.

**About NOVX Systems Inc.**

NOVX Systems is a leading-edge developer of diagnostic productivity solutions with an initial focus on on-site drugs of abuse testing. NOVX has received FDA 510(k) clearance and Health Canada Class III license for the iMDx System; a testing platform that enables fast, secure and reliable screening for drugs of abuse and adulterants at the point-of-care. With its electronic case management software, PatientVu, NOVX has a complete and powerful solution for on-site screening.

NOVX combines state-of-the-art photonics, innovative chemistry and customer focused design with a comprehensive data-management interface. The company has an extensive portfolio of optical, electronic, algorithm and chemically related patents pending.
