

**The National Association of Drug Court Professionals
And
NOVX Systems, Inc.**

The National Association of Drug Court Professionals (NADCP) announces its partnership with NOVX Systems, Inc. NOVX Systems which markets iMDx™ and ClientVu™, a testing platform used to screen urine for drugs of abuse as well as adulterants and case management software. NADCP proudly welcomes NOVX Systems as a Gold Member because of the company's commitment to the recovery community and their ability to provide a complete solution through their products.

NOVX is a leading edge developer of advanced solutions combining customer focused point-of-collection testing (iMDx), with a comprehensive data management system (ClientVu) designed for office or PDA. This powerful combination brings the advantages of laboratory testing with the convenience of an office-based platform in a fully integrated package.

According to NADCP Chief Executive Officer West Huddleston, "NOVX should be commended for its commitment to the vital vision, mission and work of NADCP to promote and improve drug court and other court-based intervention programs throughout the United States. Without their support, our efforts would have less of an impact."

"This marks a significant milestone for NOVX. We can now provide the forensic testing community the tools to accurately and reliably screen urine samples on-site without the need to send them out to third parties." remarked Dr. Tino Alavie, President and CEO of NOVX. "NOVX has a truly outstanding solution that provides an integrated and fully automated environment for office-based screening".
